**717 Vilter Refrigeration Oil Replacement by Talon**

Replaces: Vilter      Availability: In Stock In stock

Part Number: AZ31809      Type: Talon Premium Refrigeration Compressor Lubricant

Online Price: **\$149.91**  
 List Price: ~~\$184.00~~

**Features**

- Low solubility with ammonia

- Low volatility, resulting in less carryover to evaporators
- Thermal and oxidative stability promotes longer fluid life and extended oil-drain intervals
- Pour point enhanced as a result of the addition of proprietary additives
- Non-toxic/non-hazardous
- Increased protection against rust, corrosion, carbon and varnish
- Excellent film strength and anti-wear properties for better protection of compressor at lower temperatures and better protection at high temperatures
- Specifically designed for use in ammonia refrigeration compressors
- High flash and auto-ignition points for added safety
- High viscosity index for superior pumpability properties at lower temperatures and better protection at high temperatures

**Description**

AZ31809 represents the next generation of 2-stage hydrocracked ammonia refrigeration lubricants. This lubricant is an enhanced version of the technology used by most OEMs. It offers reduced solubility with ammonia, less oil carryover, and better pumpability even under extremely low-temperature conditions. AZ31809 is also completely top-off compatible with most normal paraffinics, naphthenics, alkybenzenes, PAOs, and single-stage hydrocracked products.

**Specifications**

Viscosity Grade	68
Viscosity cSt @ 40°C	64.2
Viscosity cSt @ 100°C	9.2
Viscosity Index	120
Flash Point °F (°C)	494 (241)
Auto-Ignition Point °F (°C)	744 (379)
Pour Point °F (°C)	-54 (-48)
Color	<.34

All Talon and equivalent products listed are 100% OEM compatible and meet or exceed OEM specification. The brand name and logos listed are for cross reference and comparative purposes only.
