

# Alexandria Comprehensive Plan

## Table of Contents

- |  |                  |
|--|------------------|
| <b>1. Introduction</b>                               | <b>Chapter 1</b> |
| a. Purpose   |                  |
| b. Scope of Plan                                     |                  |
| c. Historical and Regional Setting                   |                  |
| <b>2. Planning Framework</b>                         | <b>Chapter 2</b> |
| a. Introduction                                      |                  |
| b. Overview of the Citizen Participation Process     |                  |
| <b>3. Demographics, Trends and Assumptions</b>       | <b>Chapter 3</b> |
| a. Social Profile Summary                            |                  |
| b. Population Growth                                 |                  |
| c. Population and Household Projections              |                  |
| d. Building Permit Trends                            |                  |
| e. Household Growth                                  |                  |
| f. Population Characteristics                        |                  |
| g. Demographic Objectives/Policies & Recommendations |                  |
| <b>4. Natural Resources</b>                          | <b>Chapter 4</b> |
| a. Physical Setting                                  |                  |
| b. Land Resources                                    |                  |
| c. Surface Water Resources                           |                  |
| d. Ground Water Resources                            |                  |
| e. Air, Noise and Light Pollution                    |                  |
| f. Archeological Resources                           |                  |
| g. Development Constraints                           |                  |
| h. Natural Resources Objectives and Recommendations  |                  |
| <b>5. Land Use</b>                                   | <b>Chapter 5</b> |
| a. Purpose   |                  |
| b. Land Use Inventory                                |                  |
| c. Redevelopment/ Infill Potential                   |                  |
| d. Forecast Land Use Demand                          |                  |
| e. Future Land Use Plan                              |                  |
| f. Future Land Use Policies                          |                  |
| g. Annexation and Growth Boundaries                  |                  |
| h. Planning District Evaluations                     |                  |
| <b>6. Housing</b>                                    | <b>Chapter 6</b> |
| a. Housing Issues                                    |                  |
| b. Existing Housing Stock                            |                  |
| c. Community Input                                   |                  |
| d. Housing Plan                                      |                  |
| e. Housing Objective/Policies                        |                  |
| f. Resources   |                  |
| <b>7. Transportation</b>                             | <b>Chapter 7</b> |
| a. Introduction                                      |                  |
| b. Functional Classification System                  |                  |
| c. Analysis of Existing Transportation Systems       |                  |
| d. Land Use Impact on Future Traffic Volumes         |                  |
| e. Transportation Plans                              |                  |
| f. Transportation Goals and Recommendations          |                  |
| Appendix A – Traffic Calming Techniques              |                  |
